

Global Auto Lock

The Global Auto Lock is a specialty case hardened bolt seal designed primarily for railcar shipments of new automobiles. Available in green and white lock bodies for color coding and is easily visible in low light conditions. Lock body can be laser computer marked with logos, bar codes, and human readable numbers.

The Global Auto Lock is CTPAT compliant and meets the standard for a High Security Seal as outlined in the ISO 17712:2013 specifications.

APPLICATIONS
