

KT ECO - SECURITY PACKAGING TAPE

The KT ECO security VOID packaging tape is a pressure sensitive tamper evident tape that uses 25% less plastic than comparable products with superior performance. It is designed for the secure sealing in transportation of high value and high risk goods. Attempts to remove or lift the tape will result in the void message being clearly displayed on the substrate and on the tape. Its "dry peel" reaction means it cannot be reapplied once disturbed.

APPLICATIONS

- Fiber/Waxed cartons
- Shipping cartons
- Wooden boxes/crates
- Plastics
- Machine panels
- Bags
- Shrink wrap & pallets
- Freight containers

FEATURES

- Made with 25% less plastic than competitive tamper evident security tapes
- Suitable for a wide range of applications and tape dispensers
- Attempts to remove or lift the tape will result in the delamination of the top layer from the bottom layer leaving an obvious and clear irreversible security message
- All printing and numbering is under-surface/adhesive making it impossible to delete or alter the tape's information
- No adhesive residue remains to allow replacement of tape
- Approved USA TSA, approved for CCSP

MATERIAL SPECIFICATION

- 38 micron BOPP film
- Permanent rubber based adhesive
- Application temperature 10°C - 32°C (50°F - 90°F)
- Operational Temperature: -75°C - 36°C (-103°F - 97°F)
- Storage temperature 15.5°C - 29.5°C (60°F - 85°F)
- Sub-Surface printing security feature with irreversible voiding message on tape and substrate

PRINT/SIZE OPTIONS

- Available as stock seal or personalized to customer instruction
- Color, text, numbering to instruction
- Optional Numbers, Perforations, QR codes & Barcodes
- Preferred roll size: 50.8mm x 50m (2" x 164') but other sizes available up to 915 meters (3,002').
- Minimum Custom Order Quantity: 60 rolls (3 cases)

STOCK SIZES

- Green - 50.8mm x 50m (2" x 164')
- 20 rolls per case - 1 case minimum order quantity (MOQ)
- 1 1/2" x 50m (1 1/2" x 164')
- 1 1/2" x 100m (1 1/2" x 328')
